

Driven by distraction:
sustainable road safety and the
impact of autonomous driving
on vulnerable users

**“Mercedes autonomous cars
will protect occupants before pedestrians”**

**“Self-Driving Mercedes-Benzes Will
Prioritize Occupant Safety over
Pedestrians”**

All of Mercedes-Benz's future Level 4 and Level 5 autonomous cars will prioritize saving the people they carry, according to Christoph von Hugo, the automaker's manager of driver assistance systems and active safety.

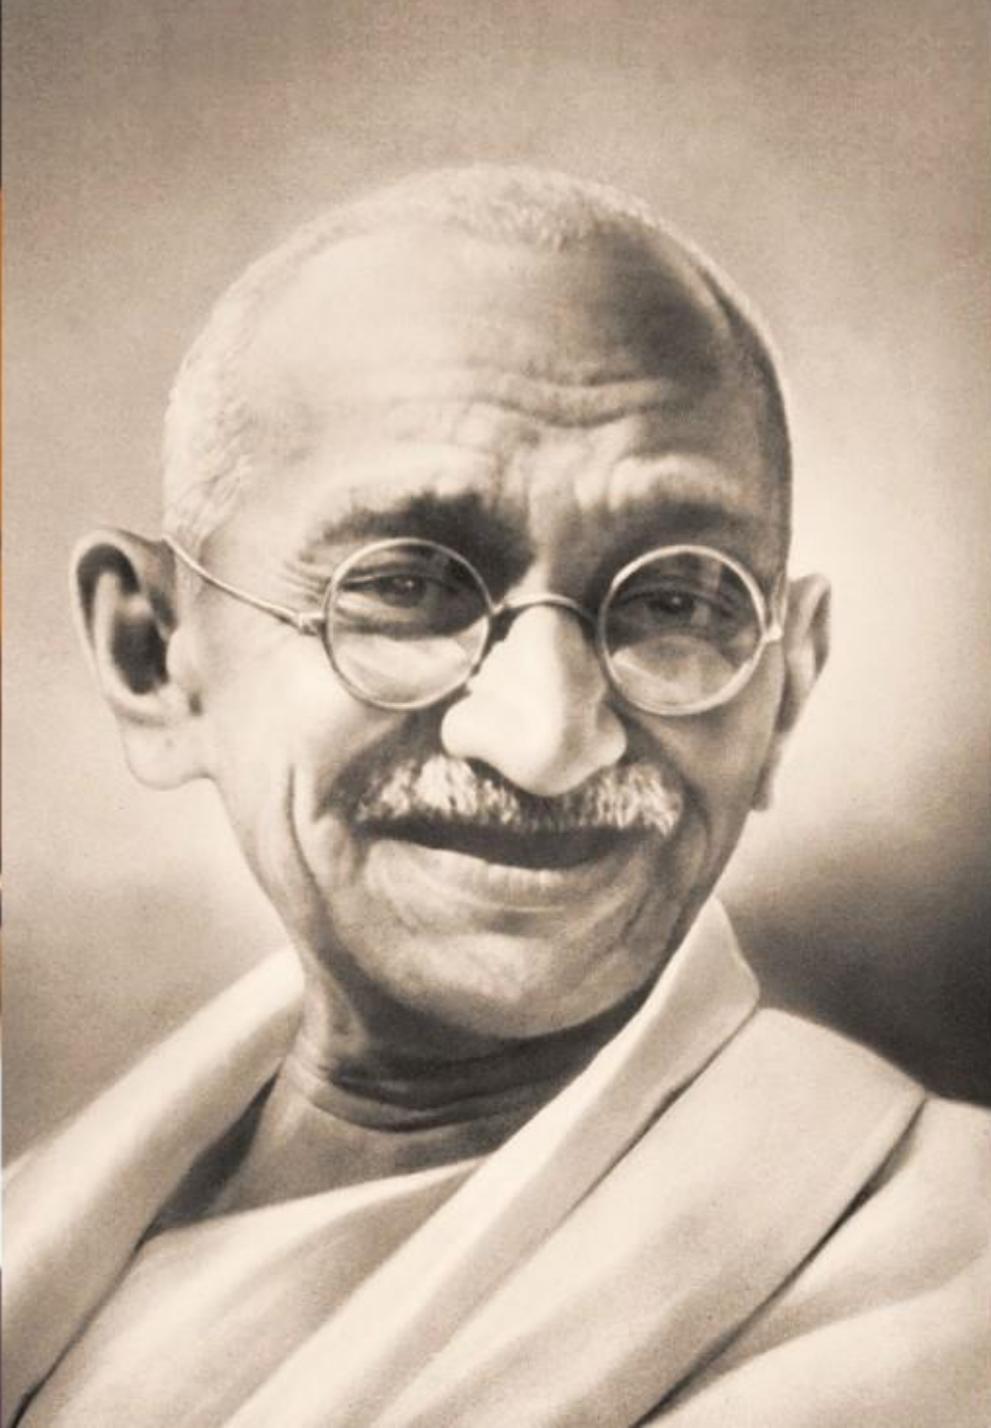

“If you know you can save at least one person, at least save that one. Save the one in the car, If all you know for sure is that one death can be prevented, then that’s your first priority.”

Christoph von Hugo, Mercedes

Strict liability
Loi de Badinter

DIRECTIVE 2009/103/EC OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL

Personal injuries and damage to property suffered by pedestrians, cyclists and other non-motorised road users, who are usually the weakest party in an accident, should be covered by the compulsory insurance of the vehicle involved in the accident where they are entitled to compensation under national civil law.

California Risk Index: Walking

Corollary

The safety of the most vulnerable should be yardstick to measure the quality of an ethically acceptable automated transport system and should be the **centerpiece of the debate.**

From the point of view of **sustainable safety and quality of life** we are all better off with **careless drivers** instead of **driverless cars** .
